Wish to build a ChatGPT like chatbot to answer FAQs?

Here is an opportunity to work with me on the latest technologies such as LLMs (Large Language Models) and libraries like LangChain.

A few years back, I had developed a chatbot for custom FAQs (Frequently Asked Questions) and had open sourced it on GitHub at **https://lnkd.in/fhJ-iVk**

The basic workflow was :
- Store the FAQs after vectorization
- At usage, the new question gets vectorized
- The most similar question/vector is found from the store
- It's answer is present as the response

Now in the era of **#chatgpt**, the same workflow can incorporate vectorization and matching logic using LLMs and libraries such as LangChain along with Vector Databases like GPT-Index, Pinecone, FAISS etc. Not just OpenAI models, but other models from sources like HuggingFace and different data formats for FAQs can also be added.
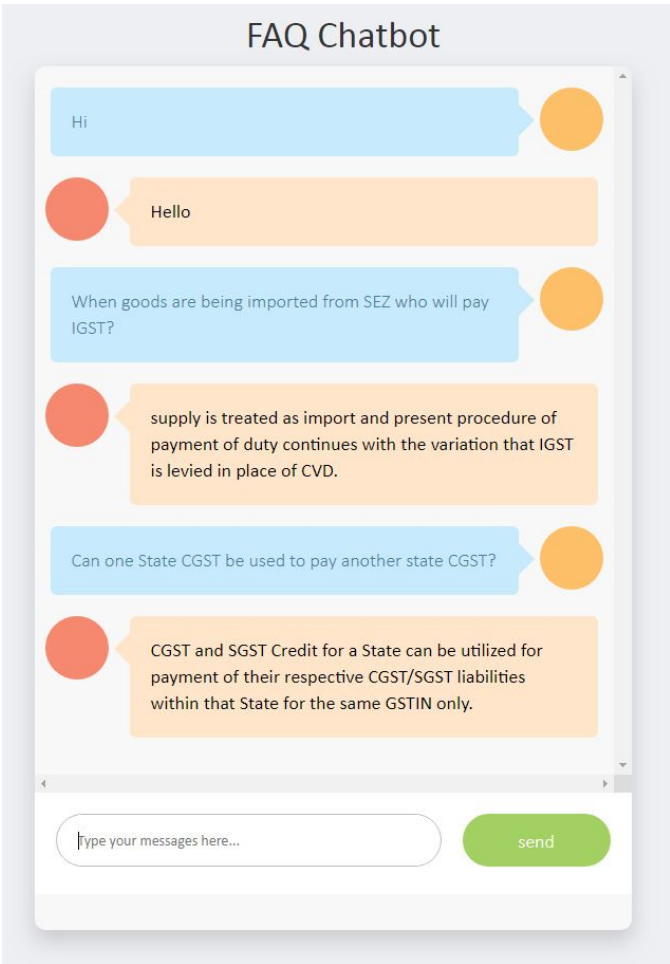

Opening up such enhancements to a wider audience.

Are you up for it? If yes, do let me know by saying "Interested" in the comments (and one more step mentioned below).

This opportunity is suitable for anyone who has background in LLMs or has strong will to ramp-up on them to keep up pace with the times and stay relevant. I will be there for overall guidance. Do note that, this opportunity is voluntary and non-commercial (I don't pay you, you don't pay me!!).

If interested, study the repo, the libraries mentioned, put your plans/analysis as "issue" labeled as "enhancement" in the repo itself and let me know about it by sending email at my firstnamelastname at yahoo dot com

## FAQ Chatbot

Hi

Hello

When goods are being imported from SEZ who will pay IGST?

supply is treated as import and present procedure of payment of duty continues with the variation that IGST is levied in place of CVD.

Can one State CGST be used to pay another state CGST?

CGST and SGST Credit for a State can be utilized for payment of their respective CGST/SGST liabilities within that State for the same GSTIN only.

**Yogesh Haribhau Kulkarni** if I have to discover the plan then why
should I work with you?

I am fine this being a non commercial project. But I expect you to come
up with the plan and share your knowledge with me. I will d⸱ ...see more

 Idea is not to come raw but see what's there and put some ideas...
handholding from scratch is difficult.

**Yogesh Haribhau Kulkarni**

Going raw means figuring out by yourself.

Once the plan is figured out. Implementation is more or less calling few
Chat GPT APIs.                                            ...see more
